Apprenticeships can be a daunting prospect for many small employers, and it is sometimes difficult to understand the benefits or the process, what support and incentives are available, or who the training providers are and what they do.

This free online webinar aims to demystify apprenticeships and gives employers the opportunity to hear from businesses in the area who have hired apprentices, learn about training providers, and ask any questions they may have about the process.

This event is funded in part by the ESF Target Apprenticeships project.
